

AL AHRAM GROUP

COMPANY BRIEF

ABOUT US

Alahram Group – is a global trading company. Our company was founded in 2011 in Egypt, in the name of Eng. Ahmed Hussien, Chairman.

Eng. Ahmed Hussien organized many successful commercial and industrial profile higher global companies in Europe, USA, UK, German, Middle East and some other countries at corn, barley etc.

OUR MISSION:

Our Mission – It is providing consumers high-quality of foodstuffs products and agricultural products at competitive prices in the global foodstuffs market and aims for smooth cooperation and hard work to establish trusting relationships with its business partners.

OUR VISION:

The world is changing all around us, Therefore, Our company strives for excellence, sustainable and access to the leading position among global export trading companies and to continue to thrive as a business over the next years and beyond, we must look ahead, understand the trends and forces that will shape our business in the future and move swiftly to prepare for what's to come .We seek to be one of the internationally respected and professionally managed companies and to spread our trade to the other parts of the world.

GLOBAL REACH

STRATEGIC PARTNERSHIP:

Our skilled financiers, lawyers, customs brokers and experts in the field of logistics supply adjusted to the end with precision. As a result, the buyer receives a high quality product at a low price.

Utmost care & control being exerted for product, safety, right from the purchase and acceptance of the raw materials till the supply of finished goods to the customers. Customer focus and to provide the requirements beyond their expectation are the main objectives of the company. The company strives to maintain its market dominance through effective control of operations and activities.

PARTNER

ON THE GLOBAL MARKET:

Our company has representative offices in the world such as Russia, Germany, Austria, Netherlands, UK, USA, Brazil, China, Saudi Arabia, UAE, Qatar, Bahrain, Libya, Tunisia and other countries, which are ready to help our the client at any time.

Thanks to an extensive network of sales offices and highly skilled traders, ALAHRAM GROUP almost instantly able to sell the products anywhere in the world and delivers the goods without any problem and the good price.

EVENTS

HACE 2015 – Egypt

Al Ahram group contributed in HACE exhibition – Cairo – at 9th of Nov 2015

HACE exhibition establishes itself as a leading market forum of Hotel Supplies and Catering Equipment, Bakery, Pastry and Ice Cream equipment.

The international Hotel supplies & Catering Equipment Exhibition HACE – HOTEL EXPO 2015 (6 in 1) is one of the largest Exhibitions in Egypt. On an area of 25.000 Square Meters. HACE – HOTEL EXPO 2015 (6 in 1) will be held at the Cairo international Conference center,

MED Coal Markets 2015 – Turkey

Al Ahram Group contributed in MED Coal Markets 2015 Conference (14-15 September Istanbul, Turkey)

This event is the specialized trade forum for coal suppliers (producers & traders) and consumers (cement & clinker producers, coal-fired power plants and steel mills).

INTERGAS 2015 – Egypt

Intergas took place at an exciting time for Egypt, with discussions around new discoveries and developments and the significant positive steps Egypt is taking towards securing its energy future

Our Products in Brief:

- 1- Sugar: (ICUMSA 45)
- 2- Grains: (including wheat, corn, barley etc.)
- 3- Oil Seeds: (including sunflower, rapeseed oil, soybean oil .. etc.)
- 4- Oils: (including sunflower, rapeseed oil, soybean oil .. etc.)
- 5- Oils and its derivatives (crude oil light-heavy) (D2-JP54-MAZUT)
- 6- Specialized oil (SN500-SN150)
- 7- Milk Powder – ALL Desserts Ores
- 8- ARMATURE-CEMENT
- 9- PHOSPATES-MANGANESE-COPPER ORE-IRON ORE
- 10- FERTILIZERS (DAP-UREA-NPK)
- 11- Sulphur

 MICROBIOLOGICAL LIMITS
 PATHOGENIC BACTERIA including SALMONELLA per 25 gram: Nil.
 Bacillus per gram: Nil

MEAT

experienced exporter of frozen meat (Halal) which is treated regarding to the Islamic concept.

OILS

(Including sunflower oil, rapeseed oil, soybean oil etc.) Our company has long been engaged in the production and sale of vegetable oil, we have a unique industrial base for the production of high quality and ecological product. We have a partnership and interest, in more than 40 plant, on an extraction of vegetable oil in Russia and the CIS. We carry out projects for the development and construction of plant, on an extraction of vegetable oil in Russia ,Brazil and Argentina.

RICE

Rice is the seed of the grass species *Oryza sativa* (Asian rice) or *Oryza glaberrima* (African rice). As a cereal grain, it is the most widely consumed staple food for a large part of the world's human population, especially in Asia. It is the agricultural commodity with the third-highest worldwide production.

MILK

Milk Protein Concentrate (MPC) 70% is a cream to yellow colored powder that has a bland flavor and a neutral odor. It contains 70% complete dairy proteins (containing both caseins and whey proteins). MPCs are used to produce processed cheese, cream cheese, ice cream, yogurt, and beverages. It is used in dairy product applications

GRAINS

Our agricultural business is based on the cultivation and processing of grain, oilseeds, vegetable oil production. We also provide storage in silos, processing, transportation and sale of consumer all over the world. We grow and supply ecological wheat, corn and barley that meets the most stringent standard. We grow up grain and buy grain from fanners, agricultural companies and processing enterprises. Our clients – food-processing industries (food, feed and consumer goods), local importers, manufacturers and trading companies.

CORN

Corn type of vegetarian is the third most, important crop in the world after wheat and rice. Corn are a good source of the B vitamins, thiamin, niacin, pantothenic acid (B5) and folate. In moderate amounts, they also supply dietary fiber and the essential minerals, magnesium and phosphorus.

Wheat

Wheat products are among the top staple diets in most countries of the world, hence it's a strategic crop whose adequate reserves create food security. Twenty percent of global calories come from wheat. There are thousands of varieties of wheat

FERTILIZERS الأسمدة الزراعية

FERTILIZERS | Phosphate

تلتزم الشركة بتحقيق أهداف ورغبات العملاء ومنح منتجات ذات مقاييس عالمية

NPK Fertilizers

The agriculture industry relies heavily on the use of NPK fertilizer.

NPK fertilizer is primarily composed of three main elements: Nitrogen (N), Phosphorus (P), and Potassium (K), each of these being essential in plant nutrition. Among other benefits, Nitrogen helps plants grow quickly, while also increasing the production of seed and fruit, and bettering the quality of leaf and forage crops. Nitrogen is also a component of chlorophyll, the substance that gives plants their green color, and also aids in photosynthesis.

Urea n46 Prilled

Product mainly used for fertilization in the planting. Also used for the production of cleaning products, detergents, soaps and detergents factories, etc

QUALITY: STANDARD EXPORT QUALITY
PRILLED
NITROGEN: 46% by weight Min
MOISTURE: 0.5% Max Fisper / 0.3% Max Dryer
BIURET: 1% Max by weight
ANTI-CAKING AGENT: Treated against Anti-Caking
FREE AMMONIA: 160 PXT, PPM. Max.
PRILL: 95% Max

Di-Ammonium Phosphate

Nutrients include P2O5 (46%) and ammoniacal nitrogen (18%).

DAP provides the correct proportion of phosphate and nitrogen needed for farming wheat, barley and vegetables. It is also applied in the early stage of fruit orchard fertilization.

Phosphate

For general use in the fertilizer industry, phosphate rock or its concentrates preferably have levels of 30% phosphorus pentoxide (P2O5), reasonable amounts of calcium carbonate (5%), and <4% combined iron and aluminium oxides. Worldwide, the resources of high-grade ore are declining, and the beneficiation of lower grade ores by washing, flotation and calcining is becoming more widespread.

Egypt's phosphate mines, deposits, and occurrences
State: Egypt
Location: Abu Bayan Area/Dungul and Kurkur
Deposit type: Marine chemical sediment
Age of mineralization: Late Cretaceous
Egypt's major industrial mineral export is phosphate, producing 1500 Mt. Phosphate and limestone are mined near Bur Safaga and Quseir on the Red Sea Coast

Gold | Silver | Copper | Scarps Iron & Steel | Phosphate

SCARPS

Scrap prices may vary markedly over time and in different locations. Prices are often negotiated among buyers and sellers directly or indirectly over the Internet. Prices displayed as the market prices are not the prices that recyclers will see at the scrap yards. Other prices are ranges or older and not updated frequently. Some scrap yards' websites have updated scrap prices.

Benefits of recycling

- 75% savings in energy
- 90% savings in raw materials used
- 86% reduction in air pollution
- 40% reduction in water use
- 76% reduction in water pollution
- 97% reduction in mining wastes

Energy savings from other metals include:

- Aluminium savings of 95% energy
- Copper savings of 85% energy
- Lead savings of 65% energy
- Zinc savings of 60% energy

GOLD

experienced trader in gold market which is the most malleable of all metals; a single gram can be beaten into a sheet of 1 square meter, or an ounce into 300 square feet. Gold leaf can be beaten thin enough to become transparent. The transmitted light appears greenish blue, because gold strongly reflects yellow and red.

IRON & STEEL

Emirates Steel

A strong partner of Emirates Steel, owned by Industries, the largest industrial conglomerate in the UAE and a driving force behind the government's industrial diversification policy. Emirates Steel Factory is strategically located in Abu Dhabi Industrial City,

35 km from the heart of Abu Dhabi, the only integrated steel plant in the United Arab Emirates, using the latest rolling techniques for the production of reinforcing steel, wire rods and heavy sections.

COPPER

all mining operations, the ore must usually be beneficiated (concentrated). To do this, the ore is crushed. Then it must be roasted to convert sulfides to oxides, which are smelted to produce matte. Finally, it undergoes various refining processes, the final one being electrolysis. For economic and environmental reasons,

SILVER

Silver has long been valued as a precious metal. More abundant than gold, silver metal has in many premodern monetary systems functioned as coinable specie, sometimes even alongside gold. In addition, silver has numerous applications beyond currency, such as in solar panels

Bitumen | **Mazut^{M100}** | **Gasoline⁹³**
Diesel^{GAS OIL} | **Jet Fuel^{JP54}**

BITUMEN

We have ability to produce high quality standard Petroleum Bitumen, Oxidized Bitumen and D2-Gasoil to supplying large customer base in the industrial and road emulsion markets our target would be to investing our market in all countries with high quality and best prices.

Bitumen source: Russia

Bitumen 80/100

Bitumen 80/100 is used as a binder of mineral aggregates in asphalt concrete and hot laid plant mix for highways, airports, parking areas, driveways and curbs

Bitumen 50/70

Bitumen 50/70 is used in road construction for asphalt mix production, especially for wearing courses and for binder courses (in low volume roads).

Bitumen 60-70

Bitumen 60-70 is used as a binder of mineral aggregates in asphalt concrete and hot laid plant mix for highways, airports, parking areas, driveways and curbs.

Bitumen 85/100

Bitumen 85/100 is also one the most popular bitumen grades for industrial usages, road construction and other projects.

CRUDE OIL

Although it is often called "black gold," crude oil has ranging viscosity and can vary in color to various shades of black and yellow depending on its hydrocarbon composition. Distillation, the process by which oil is heated and separated in different components, is the the first stage in refining..

Crude oil can be refined to produce usable products such as gasoline, diesel and various forms of petrochemicals

BASE OIL

Base oil is produced by means of refining crude oil. This means that the crude oil is heated in order that various distillates can be separated from one another. During the heating process, light and heavy hydrocarbons are separated – the light ones can be refined to make petrol and other fuels, while the heavier ones are suitable for bitumen and base oils.

Chemical substances – additives – are added to the base oil in order to meet the quality requirements for the end products in terms of, for example, friction and cleaning properties. Certain types of motor oils contain more than twenty per cent additives

The Following Products are available:

RUSSIA EXPORT BLEND CRUDE GOST 51 858-2002 R.E.B.C.O

WORK PROCEDURE

Our work procedure:

For the beginning of negotiations. We need to get from the buyer Irrevocable Confirmation Purchase Order (1CP0) with indication shipping details, name of goods, etc. as well as the following documents:

Certificate of Incorporation;

The document confirming the authority of the person to negotiate;

Memorandum or protocol on the appointment of the CEO – Director or chairman, and a copy of his passport.

The company charter (memorandum – if available) of subsequent amendments and additional (all pages); Summary of company;

Banking proof of funds to pay for the goods in any movement term (BANK REFERENCE, POF etc.)

Account, statement.

If the buyer buys the goods under the contract JV have to provide a copy of the contract, (the first, and last, page).

(Remember, in order to move quickly we start negotiations; you must to give a full set of documents. In response, we will send a confirmation (FCO) of readiness to make the delivery).

Work-Procedure

SIGNING OF THE CONTRACT:

Buyer and Seller shall agree on the terms of delivery and payment, terms.

Seller makes changes and additions to the draft contract, and sends to the Buyer for review.

Buyer is exploring a model contract within 3 international banking days and sends its amendments, if any (the amendments are to be marked in red).

Seller is exploring, as amended by the buyer within 3 international banking days, and agrees to sign a contract

The parties sign the contract, and appendices

SUPPLY OF GOODS:

Buyer issues seller's bank financial instrument (guarantee of payment for the goods) in accordance with the contract

Seller starts to deliver the goods to the Buyer under the contract.

After loading of goods in railway wagons (tank) or ship Buyer's Bank receives shipping documents and an invoice for payment, Within 3 international banking days.

After receipt and verification of shipping documents Buyer's Bank pays for the shipped consignment, Within 3 international banking days.

TRANSFER OF GOODS

Seller notifies the Buyer in writing of the arrival of the goods at the destination station or the port of unloading.

The buyer confirms in writing the willingness to accept, the consignment.

Buyer makes final payment for the goods delivered under the contract and its annexes.

The buyer receives the goods from the Seller and the Buyer becomes the owner of the goods. Within 3 international banking days.
